

MEZER
Engineering Services **EDCS**

www.edcs.co.il/en

Background

Founded in 1978 by Engineer Arie Mezer, Mezer EDCS Ltd. has been providing Israeli companies and global organizations with civil engineering services of the highest standards for over four decades. These services extend across the entire civil engineering spectrum including project management, supervision, consultation and planning.

We employ professional engineers and experts of the highest caliber who have amassed comprehensive experience in management of complex urban and intercity infrastructure projects.

In order to guarantee unrivaled professionalism, quality and service for our clients, we maintain an advanced control system and all our operations comply with the most stringent requirements of the Israeli Standards Institute and International ISO 9001: 2008 standards.

Our Vision

Continue to position the Company as global industry leader in the field of civil engineering

Offer our clients exceptional value in all areas of operations, while advancing their goals and achieving maximum results

Use our knowledge, experience and advanced professional tools to cultivate a smart and safe Israeli landscape

Tirelessly pursue professional development and superb standards of service, and swiftly adopt new engineering technologies

Our Core Values

Professional Excellence

We employ the use of proven advanced methodologies

Service Orientation

We offer clients information, advice and guidance through open and direct communication channels

Personal Development

We invest in regular professional training and development courses for our staff

Integrity and Reliability

We offer clients complete transparency and are committed to our quality standards with utmost respect for deadlines and budgets

Innovation

We use knowledge, experience, novel ideas and outside-the-box thinking to surmount complex challenges

Company Executives

Arie Mezer – President

Company founder. Studied Civil Engineering and graduated from the Technion (IIT) *cum laude*. Has over 50 years of experience in civil engineering and held senior positions at Pascal & Ludwig, Balsha-Jalon and WRD, in Israel and abroad.

Ron Mezer – CEO

Obtained a BSC and ME in Civil Engineering from the Technion (IIT) and has comprehensive experience in many diverse areas of project management. Spearheaded a substantial number of complex urban and intercity infrastructure projects.

Oz Mezer – Senior Partner

Holds a BSC and MSC in Civil Engineering from the Technion (IIT) and has extensive experience in civil engineering, with specialization in the field of road safety. Led a variety of complex large-scale projects in Israel and abroad.

Management and Supervision

Utilizing advanced management techniques and highly skilled staff, Mezer EDCS Ltd. manages all aspects of the most complex engineering projects, from initial concept to final delivery, in every area of civil engineering, including road and traffic safety, infrastructure development and sustainability.

Our unwavering focus on objectives ensures compliance with timetables, project costs, quality of work and full customer satisfaction.

Consultation and Planning

We develop a detailed engineering strategy for each project in order to identify challenges early on, prevent potential errors, improve efficiency and meet objectives.

Our engineering teams walk our clients through the entire process, from initial stages with inclusion of all relevant parties – through implementation of engineering controls and contracts, quantity bills, specifications, feasibility reports and surveys – to submission of tenders and successful project completion.

Prior to defining an engineering strategy, we explore a number of alternatives and evaluate each by parameters of benefit, cost and by product in order to customize solutions for each specific project.

Project Highlight

Over the last few decades we have executed numerous projects for government and municipal bodies, and various associations and organizations.

We take pride in our collaborative partnerships with these major entities and our key role in continual development of the country.

Project Highlight

Route 75 – Ramat Yishai-Nahalal Junction

Route 553 – Udim-Beit Yehoshua Junction

Route 531 – Jaljulya Interchange

Route 90 – Amiad Junction at southern entrance of Kiryat Shmona

Project Highlight

Botanical Gardens – Acco

Route 70 – Yagur-Zevulun Segment

Route 75 - transplanting mature oak trees

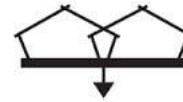

Route 77 – Hamovil - Hoshaya
